Profile:

I'm an Independent Fullstack developer
with a can-do attitude.
In the last 14 mounts I studied by
my own variety of technologies including
Frontend, Backend and some others.
In addition to self-taught during this year
I finished Frontend course at Abra-labs
and LinearB coding bootcamp.

About me-
-Coding and studding new technologies on daily basis.
-Enjoy writing code and solving problems.
-Efficient worker even on tight deadlines.

Skills:

- Typescript & Javascript
- React, Redux, React-query and many more.
- Node, Express, MongoDb.
- Working with Zeplin, Figma, Mui and more.
- Postmen, Git, Jira, Firebase, Heroku.
- Familiar with :Docker, Sql, Working with
  Micro-servers, Aws & Optimization.

Personal skills

- Independent and fast learning
- Problem Solver
- Creativity
- Leadership

Recommendations and certificates will be provided upon request.

Projects:

WeatherApp (responsive, TS-React)
WeatherApp allows to get real time update forecast for any where in the world with visual information by clicking on the map or by or searching city.
There is an option to manage favorite cites list and watch them on the map with current weather conditions.
Login with social media is an option as well.
Developed with React-TS with help of Redux, Styled-components, React-query, Google-maps and more.
The app was developed with cache memo, debounce, Optimizations, error handling, modularity and used 3 Api's.
Designed for phone, laptop and desktop screens.
The app designed to support bad and happy flow of user or program potential errors.

E-Commerce (responsive)
Allows any user to register and manage his cart. Including Api for manager that can change, add or remove any product.
Developed with React, Express, mongoose.

Wedding planner app (responsive, python , React ,Sql).
This app includes check guest status , mange check list and guest list, edit and send invitation message, auto sitting arrangement and more features.

S&S restaurant (React).
the user can order from the restaurant, with active shopping card and auto invoice sending system.

Bulls&cows' games (responsive, vanilla Js).

Education:

Abra labs Frontend course   2022
Diving deep into: Javascript, Typescript, Css, Html, React, Redux, React-query Styled-components and other's frontend technologies.
During the course we learn with project-based learning.

Harel high school   2012-2015
GPA of 85
5 units of Math' and English.

Work Experience

LinearB bootcamp   2022
One month of planning and building a wedding planner app
in a team, my responsibility was mostly on frontend part.
The project was built with :React, Mui, Python, Sql and more.
During the bootcamp we also touch and used technologies like Jira , Codespace, Git, Aws services & etc.

Math tutor for children in middle school   Oct 2021 - Present

Ben Shemen Boarding school
Requires a lot of patient and teaching ability.
Independent work That requires solving educational problems.
